

A soul has no color

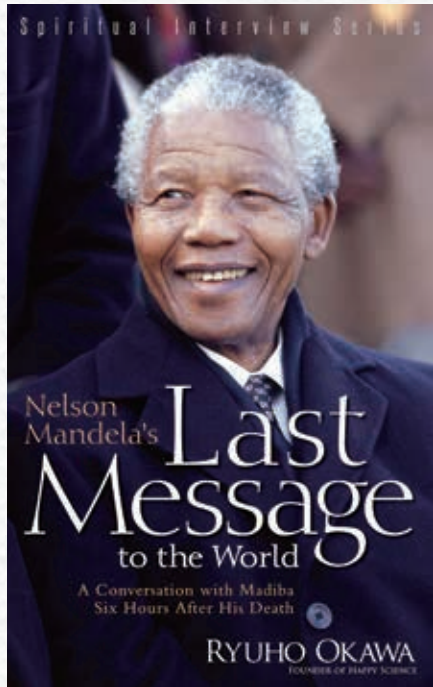

HS NELSON MANDELA FUND

A Soul has no Color.

*"I came here to prove that the reality of human beings is the soul.
This is why being a colored person or not is not important.
God made souls.
Some were born as white, some born as yellow, some born as black.
But they are fundamentally equal.
Here is the proof: You have souls, but a soul has no color.
This is the point of religion. This is the point of equality and freedom".*

(excerpts from Nelson Mandela's Last Message to the World)

The "HS Nelson Mandela Fund" was established within Happy Science in 2013 to commemorate the publication of *Nelson Mandela's Last Message to the World* (IRH Press), and to realize the ideals Mr. Nelson Mandela had for this world, with the aim to nurture future leaders of each country.

We support "people in circumstances beyond their control".

Such as
people who suffer
from discrimination
due to race
gender
caste
people who cannot receive education
caused by poverty,
political oppression
and
people who cannot receive medical treatment.

MORE DETAILS

Master Ryuho Okawa always teaches us that education is important. We **support schools** which cannot afford to buy enough instructional materials, and **give opportunities to receive education** to people such as those who suffer from discrimination or poverty, or who have lost their parents because of war.

Some areas don't have basic services (safe water, sanitary system, medical treatments, and energy provision). We **give the most suitable support** for each region through Happy Science branches, especially in Asia and African areas.

We report the activities we have done to the people who support the fund.

OUR AIM

We aim to give people hope and walk the path toward independence when they become part of society.

There surely will appear outstanding leaders who can open up the future of their countries among the youth we support through the fund.

To contribute, please make your donation* at a Happy Science local branch or shoja toward “HS Nelson Mandela Fund”. With the support of people all over the world, we wish to expand our activities to eliminate discrimination and poverty. Through the power of education, knowledge and faith, we hope to realize the ideals of Nelson Mandela’s spirit and God†. We hope that many will make contributions towards this goal.

* ‘Donations’ in Happy Science are called ‘Happiness Planting’

Happy Science is a non-profit religious organization and we are able to support our various charities and other happiness movement activities only with your generous donations. They are called ‘Happiness Planting’ which means we are planting seeds for the happiness of future generations.

† ‘God’ in Happy Science is ‘Lord El Cantare’

In Happy Science, we have faith in Lord El Cantare, who is the God of the Earth. He is the Supreme God who has been watching over humankind since the beginning and has the mission to guide humanity to happiness and to create a Utopia in this world. El Cantare means “the Light of the Earth.”

Master Ryuho Okawa

Ryuho Okawa is the founder and CEO of a global spiritual movement, Happy Science, and international best-selling author with a simple goal: to help people find true happiness and create a better world. His deep compassion and sense of responsibility for the happiness of everyone has inspired him to publish over 2,600 titles of religious, spiritual, and self-development teachings covering a broad range of topics including: how our thoughts influence reality; the nature of love, and the path to enlightenment. Okawa also lectures and writes on the topics of management, economy, current affairs and global politics. Okawa’s books have been translated into 31 languages; many of which have become international best-selling titles with more than 100 million copies sold worldwide.

ABOUT HAPPY SCIENCE

Happy Science is a global movement that empowers individuals to find purpose and spiritual happiness and to share that happiness with their families, societies, and the world. With more than 12 million members around the world, Happy Science aims to increase awareness of spiritual truths and expand our capacity for love, compassion, and joy so that together we can create the kind of world we all wish to live in. Activities at Happy Science are based on the Principles of Happiness (Love, Wisdom, Self-Reflection, and Progress). These principles embrace worldwide philosophies and beliefs, transcending boundaries of culture and religions.
